Nooch

POLTRONE

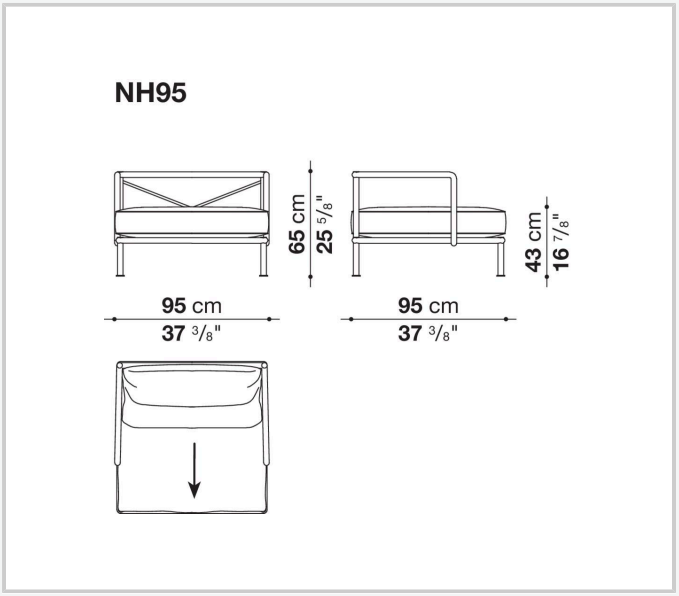
2023

Piero Lissoni

Description

After the great success of Borea, Piero Lissoni and B&B Italia continue to pursue research and sustainability in the outdoor sector, creating Nooch, a modular seating system whose name is inspired by the tropical botanical garden of Nong Nooch in Thailand. The armchait key feature is the tubular structure in recycled aluminium, a light and strong material, completely recyclable. A choice inspired by simplicity, which recalls elementary tubular structures and ennobles them with a design that pays attention to every detail. The intersection of the structural elements represents the iconic feature of this collection, with the particular elbow curve achieved by the way the aluminium bends. A design and engineering detail that combines function and beauty. The paddings are designed with sustainability in mind. They use regenerated materials, which are completely separable, and consist of two layers of polyurethane with different densities and firmness: one layer made of polyurethane recycled from production waste and one made of virgin bio-polyurethane, both wrapped in an outer sheath of recycled PET.

Technical information

Frame
die-cast aluminium and extrusions
Back and seat upholstery
shaped polyurethane, biodegradable polyester fibre recycled from PET, cover in water repellent polyester fibre
Cushion upholstery (NH60_60C)
biodegradable polyester fibre recycled from PET, cover in water repellent polyester fibre
Spacers
plastic material
Ferrules
thermoplastic elastomer
Waterproof cover cloth
PES fabric coated on one side in PU
Cover
fabric in limited categories


Technical drawings
