

Erica

CHAIRS

2025

Antonio Citterio

Description

Designed with a technological blend of extruded and die-cast aluminium elements, the Erica chairs are offered in different versions, including a stackable one, and with two types of interlacing. The refined colour combinations include a wide range of finishes for the frames to match the different colours of the interlacing, made of polypropylene ribbons. The seat cushions, embellished with a decorative profile, guarantee comfortable relaxation. The lightness and the design make Erica ideal for both public and residential settings.
