

Charles

BEDS

2004

Antonio Citterio

Description

Charles is a double bed with fabric or leather upholstery available in two versions: a more striking one, in which the sides protrude from the slightly recessed mattress, and a simpler one in which the band is flush with the mattress. An evolution of the sofa of the same name, the Charles bed features the signature design of the inverted "L" shaped foot. It also comes in a version with wheels.
