

J.J.

ARMCHAIRS

2012

Antonio Citterio

Description

The J.J. family presents armchairs with a different look and a wide variety of materials: with a steel-rod structure supporting a wooden frame, they convey a certain degree of lightness and hint at traditional aesthetics. Details are carefully studied for every armchair as the polypropylene ribbons that design the backrest. There is also an armchair fitted with a sleigh, the expression of the traditional rocking chair that becomes glamorous when it is attired in long haired Mongolian lamb fur.

Technical information

Schale

Massivholz

Riemen

Polypropylen

Füllung

geformtes Polyurethan

Armlehne (PJ85FN-PJ99FN-PJ99DN)

Leder, Stahlblech

Kopfstütze (PJP)

Polyesterfaser, Futter aus Baumwolle, Gegengewicht aus Stahlblech

Traggestell

gezogener Stahl

Kufengestell (PJ99DN)
