

# Erica

ARMCHAIRS

2025

Antonio Citterio

## Description

The Erica armchairs incorporate the characteristic elements of the entire series: the powder coated die-cast aluminium frame which offer lightness and durability, the interlacing made of polypropylene ribbons designed for outdoor use, and the foot design which provides a sense of visual and formal continuity. They are offered in different sizes and depths, including a version with a high backrest and integrated headrest ideal for relaxation. The seat cushions upholstery, embellished with a decorative profile, grants an appearance of natural softness, making them particularly inviting. The refined shades of the frame and interlacing are complemented by a vast range of cushion covers, in an array of tones and designs, all co-ordinating with each other. The lightness and refined design make Erica ideal for both public and residential settings, delivering ergonomic comfort together with strength for outdoor use.

# Technical information

---

**Frame**

die-cast aluminium and extrusions with polyester powder painting

**Back upholstery**

polyester fiber recycled from PET, cover in water repellent polyester fibre
