
Borea

POLTRONE

2021

Piero Lissoni

Description

The Borea armchair with striking proportions and the Borea small armchair, forming part of a collection of outdoor seats, tables and small tables, stands out for its tubular metal frame featuring a fluid, continuous design, without joints or interruptions, and attractive feet. The metal bending and curving processes used exploit techniques typically used in the aeronautical sector and transport them into the world of outdoor furniture, giving life to a product with an unmistakable style. Ultra-generous and cosy cushions that are soft, relaxing and sustainable, ensure maximum comfort. The padding is in 100% polyester fibre obtained from the recycling of PET plastic bottles and surrounds a polyurethane section of different densities. 280 bottles are used to create the padding of a Borea armchair, available in a wide range of covers.

Technical information

Frame

tubular and aluminium sheet

Upholstery

shaped polyurethane of different density, polyester fibre

Ferrules

plastic material

Waterproof cover cloth

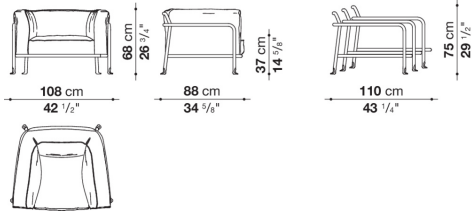

PES fabric coated on one side in PU

Cover

fabric in limited categories (with profile)
