Piero Lissoni

## Description

---

With its modern line, Borea is a small, stackable dining armchair in painted aluminium for outdoor use. Particularly attractive is the lower part of the frame that curves slightly outwards as it rests on the ground. The metal bending and curving processes used exploit techniques typically used in the aeronautical sector and transport them into the world of outdoor furniture, giving life to a product with an unmistakable style. Comfort is ensured by extremely soft cushions that are also environmentally sustainable. The padding is in 100% polyester fibre obtained from the recycling of PET plastic bottles and surrounds a polyurethane section of different densities. Borea is a complete collection of outdoor furniture inclusive of chairs, tables, sofas, armchairs and small tables.

## Technical information

---

**Frame**

tubular and aluminium sheet

**Upholstery**

shaped polyurethane of different density, polyester fibre

**Ferrules**

plastic material

**Waterproof cover cloth**

PES fabric coated on one side in PU

**Cover**

fabric in limited categories (with profile)
