# Backstage - Backstage '18

NIGHT STORAGE UNITS

2013

Antonio Citterio

## Description

---

An innovative wardrobe system with a sophisticated personality, Backstage stands out for the use of precious materials, exclusive finishes details, and the wide range of versions available. The door opening system, inspired by contemporary architecture, offers a revolutionary solution: the innovative mechanism developed by B&B Italia opens the full height doors with simultaneous rotation and translation (roto-translation) that ensures reduced bulk and better accessibility to internal compartments. Backstage also proposes an exclusive choice of accessories and fittings that underscore expert craftsmanship and the quality and purity of materials. Highly aesthetic and functional, the boiserie effect of the surfaces allows Backstage to adapt to various spaces, and not only into the bedroom.

## Technical information

---

**Side, top, back structure, wardrobe base and internal boiserie panel of the walk-in wardrobe**

melamine faced panel in refined wood particles

**Skirting frame structure**

metal profiles

**Swinging-sliding door/Pocket door**

honeycomb panel with double tensioner doors inserted inside the frame

**Hinged door, closing panel, finish side, boiserie pane**

panel in wood particles

**Upright**

extruded aluminium

**Opening mechanism and profiles**

extruded aluminium and steel

**Shelf**

panel in refined wood particles, melamine-faced, lacquered or covered in bonded leather

**Drawer structure**

panel in wood particles, lacquered wood fibre panel, drawers mounted on total extraction runners with shock absorbers, trinket tray top with insert in bonded leather

**Drawer handle**

aluminium with insert in bonded leather

**Walk-in wardrobe container structure**

panel in wood particles

**Walk-in wardrobe container hinged door**

panel in refined wood particles, lacquered or covered in bonded leather

**Clothes rail**

extruded aluminium with supports in die-cast Zamak

**Hanger holder**

shell in plastic and hook in metal

**Grid for shirts**

panel in wood particles

**Internal drawer spacers**

bonded leather

**Structure with extractable tray**

top in tempered smoky glass, HPL stratified laminate panel with aluminium drawer with melamine bottom

**Internal divider extractable tray/Accessorised tray**

solid wood covered in bonded leather

**Internal tray for drawers**

multi-layered wood covered in bonded leather

**Belt holder**

HPL stratified laminate covered in bonded leather and hooks in aluminium

**Trinket tray**

HPL stratified laminate and wood fibre panel covered in bonded leather

**Jewellery box**

solid wood and wood fibre panel with ring compartment in bonded leather

**Adjustable mirror**

extruded aluminium with wood particle panel melamine and natural mirror with safety film

**Fixed mirror**

extruded aluminium and natural mirror with safety film

**Various accessories**

beech

**LED lighting system**

Strip LED 24V DC 4000K

**EU/US power supply unit**

input voltage 110V-120V/220V-240V 50Hz, output voltage 24V DC, maximum wattage 60W/120W

**Proximity sensor switch radio-controlled from a central unit**

voltage 24V 50HZ
