

Tobi-Ishi

TABLES

2012

Edward Barber & Jay Osgerby

Description

Available both round and rectangular with rounded ends, Tobi-Ishi is a sculptural table that makes reference, stylistically and in its very name, to the ornamental stones used in traditional Japanese gardens. This iconic table brings together functional features with a statuesque appearance, with truly amazing results. The overhanging top and bases look different depending on the viewpoint, while the various finishes endow the table with highly personal interpretations: from cement grout to marble, and from matt lacquering in a wide range of colours to glossy lacquering in sophisticated candy red and smoke blue hues.

Technical information

Top
