Belle

CHAIRS

2018

Naoto Fukasawa

Description

The Belle wooden chair stands out for its rounded lines and leather upholstered seat. The round section legs are given a classical feel by curving slightly outwards in the lower part. Towards the top they join up with the backrest to create elegant, elbow-shaped armrests. The backrest comes in two versions: in wood, in the same finishes as the frame, or upholstered in leather to match the seat. With a clever play of literary and stylistic references, the Belle chair is the delicate, feminine counterpart to the Bull table, but can easily be combined with other models as well.

Technical information

Frame
solid wood
Back
hard polyurethane or solid wood
Seat
veneered multi-layered wood panel
Seat upholstery
flexible cold shaped polyurethane foam
Ferrules
plastic material
Cover
Gamma leather
