

Coronado

SOFAS

1966

Afra & Tobia Scarpa

Description

The evergreen Coronado sofa is the quintessential symbol of relaxation. Its comfort is guaranteed by a suspension system made from harmonic steel bands inserted into the structure of the back. The product's aesthetics, conceived as a trait-d'union between period furniture and the growing desire for modernity, has decreed its success over time. Its revolutionary personality in terms of design and of materials offers a prime example of B&B Italia's industrial culture. First launched in 1966, Coronado emerged from the idea of matching an iron frame with the revolutionary technology of cold moulded polyurethane foam, which B&B Italia had introduced to the furnishing sector. In addition to the intrinsic innovations that Coronado presented in terms of design, materials and technologies, the design also optimised production times, while also reflecting the company's international calling. Besides the sofa, the collection also includes an armchair.

Technical information

Internal frame

tubular steel and steel profiles

Internal frame upholstery

Bayfit® flexible cold shaped polyurethane foam, polyester fibre cover

Seat and armrest cushion upholstery

shaped polyurethane of different density, polyester fibre

Back cushion upholstery

shaped polyurethane, polyester fibre cover

Feet

thermoplastic material

Cover

fabric or leather
