
Oskar

TABLES

Vincent Van Duysen

Description

The architectural Oskar table, named after Oscar Niemeyer, one of the great masters of modernist architecture, stands out for its harmony of shape and for the tactile sensations of the various materials used. Its proportions, play of volumes and multiple finishes make it extremely customisable. In its most striking version, the top in cathedral glass with an irregular surface and a light green hue perfectly matches the lacquered legs in glossy emerald green. Oskar is available in three sizes: three rectangular and one square.

Technical information

Top
