Antonio Citterio

Description

The Richard seating system stands out for its balanced and contemporary design, evocative of classic atmospheres. Its modularity is reflected by the presence of several elements, all in two depths: one for more formal and contained solutions, and the other for larger, more informal compositions. The system’s extreme flexibility and the ease with which the different elements can be assembled together allows the living space to be interpreted in the most varied configurations, from formal to more relaxed, with seats, benches, ottomans and chaise longues. The wide range of covers, in fabric with matching tone-on-tone or contrasting textile profiles, or in leather with profiles in the same material, allows for even greater customisation, offering monochromatic or contrasting solutions. The frame is underscored at the base by a metal profile. Optional cushions in various sizes add to the overall comfort.

Technical information

Internal frame
tubular steel and steel profiles
Internal frame upholstery
Bayfit® flexible cold shaped polyurethane foam, polyester fibre
Seat cushion upholstery
shaped polyurethane of different density, visco-elastic polyurethane, sterilized down, polyester fibre
Back cushion upholstery
polyester fibre, shaped polyurethane, sterilized down
Lower edge
die-cast aluminium and extrusions
Ferrules
thermoplastic material
Cover
fabric (profiles in Bellano or Bormio fabric) or leather
