# Athos '12

TABLES

Paolo Piva

## Description

---

The Athos '12 rectangular table comes in two lengths, in both a fixed and an extensible version, the latter being characterised by an invisible mechanism that allows it to be lengthened so as to accommodate up to twelve people. The V-shaped metal frame supports a thick top softened by rounded edges obtained by means of a complex milling process that enables the wood grain to remain even throughout the entire surface.

# Technical information

---

## **Top**

veneered wood particles panel

## **Support frame**

drawn steel

## **Fixed tables frame**

steel sheet

## **Extensible tables frame**

anodized aluminium extrusions, plastic material tools

## **Ferrules**

thermoplastic material
