
Eracle

STORAGE UNITS

Antonio Citterio

Description

Highly practical with rigorous, well balanced proportions, storage units in the Eracle collection match the bookcases that launched the collection in 2010. While the frame is made of all Maxalto wood types, the interior is lined with coloniale leather melamine faced, the transparent double-glass hinged doors are lined on the inside with a high-tech bronzed metal fabric and framed with bronzed profiles. Despite the use of valuable materials, the final result is minimal and sophisticated. Doors close gently, shelves and drawers slide effortlessly. And there is also a surprise, a lamp to light up the interior of the storage unit, a practical vintage detail inspired by bar units typical of the 1950s.

Technical information

Frame:

veneered wood particles panel
